MongoDB MongoDB Medellin

@MongoDB

Que es @MongoDB

'MongoDB (from "humongous") is an open-source document database, and the leading NoSQL database. Written in C++.' https://www.mongodb.org/

'MongoDB was not designed in a lab. We built MongoDB from our own experiences building large-scale, high availability, robust systems...' Eliot Horowitz, CTO and Co-Founder

NOSQL

En informática, NoSQL (a veces llamado 'no sólo SQL') es una amplia clase de sistemas de gestión de bases de datos que difieren del modelo clásico del sistema de gestión de bases de datos relacionales (RDBMS) en aspectos importantes, el más destacado que no usan SQL como el principal lenguaje de consultas. http://es.wikipedia.org/wiki/NoSQL/

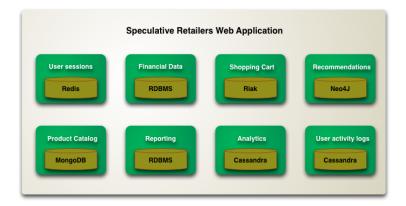

NOSQL

Las características comunes de las bases de datos NoSQL son:

- No utilizan el modelo relacional.
- Corren bien en clusters.
- Open-source.
- sin esquemas.
- El resultado mas importante del aumento de las bases de datos NoSQL es la Persistencia Poliglota.

http://martinfowler.com/articles/nosqlKeyPoints.html

Persistencia poliglota

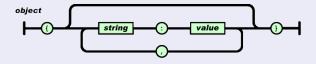

MongoDB MongoDB Medellin

JSON

Definición

(JavaScript Object Notation) Formato de intercambio de datos.

Esquema

Ejemplo

```
{ "llave": "valor" } ó {}
```

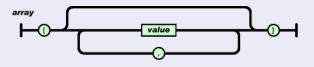

MongoDB MongoDB Medellin

JSON

Definición array

Es el tipo de dato que puede contener un JSON.

Esquema

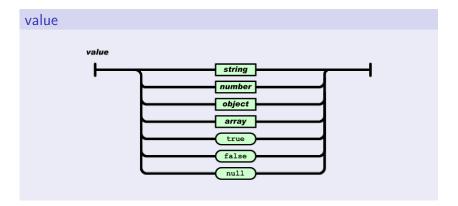

Ejemplo

["valor1", "sena",2014,true]

JSON

Definición valor

Es el tipo de dato que puede contener un JSON.

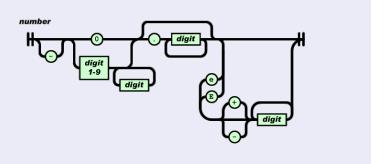

JSON

Esquema string string Any UNICODE character except " or \ or control character quotation mark reverse solidus solidus backspace formfeed newline carriage return horizontal tab 4 hexadecimal digits

MongoDB MongoDB Medellin

JSON

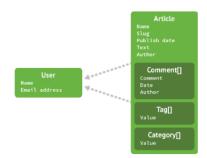

Esquema number

Caracteristicas

1. Document-Oriented Storage

Las **colecciones** Son esquemas dinamicos, flexibles que ofrecen simplicidad y potencia.

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support

Index provee alto desempeno en operaciones de lecturas.

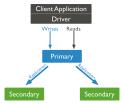

MongoDB indexa utilizando estructura de datos B-tree.

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication

replica set en MongoDB es un grupo de procesos mongod que mantienen el mismo conjunto de datos. provee redundancia y alta disponibilidad.

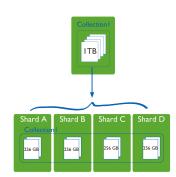

MongoDB MongoDB Medellin

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication
- 4. Auto Sharding

Escalar horizontalmente sin comprometer la funcionalidad.

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication
- 4. Auto Sharding
- 5. Querying

Gran cantidad de consultas basadas en los documentos.

Example (querys)

```
db.collection.find({})
db.collection.find({'field':'jesse'})
db.inventory.find().sort({field:1})
```

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication
- 4. Auto Sharding
- 5. Querying
- 6. Map Reduce

Map Reduce es un paradigma de procesamiento de datos para condensar grandes volumenes de datos.

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication
- 4. Auto Sharding
- 5. Querying
- 6. Map Reduce
- 7. GridFS

GridFS es una especificación para almacenar y recuperar archivos que exceden el limite del tamano de 16MB en los documentos BSON.

util utillizarlo para almacenar imagenes, audio, video, archivos de texto, etc...

MongoDB MongoDB Medellin

Caracteristicas

- Document-Oriented Storage
- 2. Full Index Support
- 3. Replication
- 4. Auto Sharding
- 5. Querying
- 6. Map Reduce
- 7. GridFS
- 8. Other more...

- MMS.
- Partner with MongoDB.
- Multiples drivers.

Instalación

Desde Terminal

```
1 sudo apt-key adv --keyserver hkp://keyserver
     .ubuntu.com:80 --recv 7F0CEB10
2 echo "deb http://downloads-distro.mongodb.
    org/repo/ubuntu-upstart dist 10gen" |
    sudo tee /etc/apt/sources.list.d/mongodb.
    list
3 sudo apt-get update
 sudo apt-get install -y mongodb-org=2.6.1
    mongodb-org-server=2.6.1 mongodb-org-
    shell=2.6.1 mongodb-org-mongos=2.6.1
    mongodb-org-tools=2.6.1
5 sudo service mongod start
 mongo
```

SHFLL

```
hannover@hannoverPortatil:~/Cogollodevs/Developments/latex/presentacionesLatex$ mongo
MongoDB shell version: 2.6.5
connecting to: test
 help
       db.help()
                                     help on db methods
       db.mycoll.help()
                                     help on collection methods
       sh.help()
                                     sharding helpers
       rs.help()
                                     replica set helpers
       help admin
                                     administrative help
       help connect
                                     connecting to a db help
       help keys
